Data Analyst — Python — SQL — Power BI — Machine Learning

OBJECTIVE

Entry-level Data Scientist with expertise in Python, SQL, and Machine Learning. Skilled in transforming complex datasets into meaningful insights through EDA, statistical modeling, and visualization tools like Power BI and Tableau to drive strategic, data-driven decision-making.

TECHNICAL SKILLS

Programming: Python, R, SQL

Analytics & BI: Excel, Power BI, Tableau

Libraries: Pandas, Numpy, Seaborn, Matplotlib, Scikit-Learn, PyTorch

Databases: MySQL

ML: EDA, Feature Engineering, Regression, ETL

EXPERIENCE

Data Analytics Intern

May 2025

VCodez, Chennai, India

- Cleaned and preprocessed datasets using SQL and Python to ensure data quality.
- Performed EDA to identify trends and anomalies; optimized SQL queries for extraction.
- Created interactive dashboards in Power BI to communicate actionable insights.

VIRTUAL EXPERIENCE

Data Analytics (Virtual Simulation)

Nov 2024

Accenture, Remote

- Completed analytics-focused simulation emphasizing data cleaning and storytelling.
- Analyzed datasets using Python and Excel to support data-driven decision making.

Data Visualization (Virtual Simulation)

Nov 2024

TATA, Remote

- Transformed raw data into meaningful insights using interactive dashboards for stakeholders.
- Practiced data-driven storytelling to support executive business strategy decisions.

PROJECTS

Global Layoffs Data Analysis — GitHub

2026

- Developed a SQL workflow to cleanse and standardize 10,000+ global layoff records, ensuring data integrity.
- Standardized key attributes across raw datasets to streamline them for large-scale analytical consumption.
- Performed EDA to identify layoff patterns by industry, geography, and time for strategic reporting.

Boston Housing Price Prediction

2026

- Built regression models achieving an R-squared score above 0.85.
- Improved prediction performance by 15 percent using feature engineering techniques.
- Visualized relationships between housing prices, location, and socioeconomic factors.

InsightSphere: Retail Sales Analytics

2025

- Processed 10,000+ sales records using Excel and SQL to perform detailed EDA.
- Identified customer purchase trends, seasonality, and product performance.
- Built interactive dashboards in Tableau/Power BI for stakeholder reporting.

EDUCATION

M.Sc Applied Data Science — SRM Institute of Science and Technology, Chennai

B.C.A Computer Applications — The New College (Autonomous), Chennai

Senior Higher Secondary — Montfort Academy Matriculation Higher Secondary School, Chennai

CORE COMPETENCIES

- Exploratory Data Analysis
- Dashboard Development
- Statistical Analysis
- Machine Learning Algorithms
- Critical Thinking
- Data Storytelling

CERTIFICATIONS

Cisco Networking Academy: Data Analytics Essentials — Practical Excel prep, SQL, and Tableau exposure.

Cisco Networking Academy: Introduction to Data Science — Data privacy, ethics, and ML model foundations.
